

Day 3: Header Forensics & IOC Extraction Engine Foundation

Key Milestone: Core Email Parsing & Extraction Services

Sprint Focus: Execution of core deliverables for Day 3 across AI/NLP, Header Forensics, IOC Extraction, Graph Correlation, Case Management, and UI Integration.

Daily Deliverables: IOC Extraction Service v1.0, Received Chain Parser, Cockpit Main Navigation Component.

Individual Team Member Task Breakdown & Contributions

Team Member & Lead Role	Domain & Ownership Area	Tasks Executed & Deliverables on Day 3
Muniswami.Y AI / NLP Lead	Explainable AI, Intent & Phishing Detection, Social Engineering signals	Integrated Named Entity Recognition (NER) pipeline to detect impersonated brand names (e.g., Microsoft, Google, PayPal, SBI, Koyeb).
Jeevan reddy.G Header & Forensics Lead	Email header analysis, SPF/DKIM/DMARC, Mail path reconstruction, Timestamp analysis	Developed multi-hop Received header parser to extract client origin IPs, MTA relay timestamps, and calculate transmission transit latency.
Lahari.K IOC & Infrastructure Lead	URL, Domain, IP extraction, Geolocation, ASN/ISP mapping, Malicious indicator detection	Built async DNS resolver module (aiodns/dnspython) to perform A, MX, NS, and TXT record resolution for sender domains.
Hemanth.P Graph & Campaign Intelligence Lead	Attack Relationship Graph, Similarity detection, Campaign grouping & correlation	Engineered graph node models for Threat Actors, Target Mailboxes, Malicious IPs, Phishing Domains, and Shared Infrastructure.
Abbas.N Risk, Case & Response Lead	Dynamic Threat Score engine, Automatic Forensic Case creation, Recommended Response actions	Created Case creation service with automated UUID/Case-ID generation ('TT-2026-XXXX') and initial risk weighting algorithm.
Moulaanbee.N Frontend + Assistant + Simulator Lead	Dashboard, Visualizations (Graph, Map, Timeline), AI Chatbot, Email Threat Simulator, Overall UI/UX	Built the Cockpit Dashboard navigation shell, status indicator badges, and dynamic Case Selection Sidebar.

Integration, Verification & Quality Assessment

Cross-Module Integration:	End-to-end extraction test: parsing sample phishing .EML files outputting structured IOC JSON payloads.
Quality Assurance Status:	All code unit tests and interface contracts for Day 3 verified clean. Git commit pushed with zero blocking errors.
