

Day 6: Threat Relationship Graph & Campaign Correlation

Key Milestone: Cross-Incident Campaign Correlation Engine

Sprint Focus: Execution of core deliverables for Day 6 across AI/NLP, Header Forensics, IOC Extraction, Graph Correlation, Case Management, and UI Integration.

Daily Deliverables: Phone OSINT Extractor, Campaign Correlation Graph, Explainable AI Reasoner.

Individual Team Member Task Breakdown & Contributions

Team Member & Lead Role	Domain & Ownership Area	Tasks Executed & Deliverables on Day 6
Muniswami.Y AI / NLP Lead	Explainable AI, Intent & Phishing Detection, Social Engineering signals	Constructed the Explainable AI rationale generator producing natural language reasoning for why an email is flagged as malicious.
Jeevan reddy.G Header & Forensics Lead	Email header analysis, SPF/DKIM/DMARC, Mail path reconstruction, Timestamp analysis	Engineered multi-tier fallback DNS resolver (Subdomain -> Parent Domain -> Root Domain -> Payload Host) for resilient origin IP recovery.
Lahari.K IOC & Infrastructure Lead	URL, Domain, IP extraction, Geolocation, ASN/ISP mapping, Malicious indicator detection	Added Phone Number OSINT extractor using international E.164 and localized Indian/US phone patterns; linked to telecom intelligence records.
Hemanth.P Graph & Campaign Intelligence Lead	Attack Relationship Graph, Similarity detection, Campaign grouping & correlation	Finalized bipartite graph linking suspect phone numbers, crypto wallet addresses, and phishing URLs to past known cyber syndicates.
Abbas.N Risk, Case & Response Lead	Dynamic Threat Score engine, Automatic Forensic Case creation, Recommended Response actions	Implemented automated case prioritization queue: auto-assigning critical incidents to priority investigative queues.
Moulaanbee.N Frontend + Assistant + Simulator Lead	Dashboard, Visualizations (Graph, Map, Timeline), AI Chatbot, Email Threat Simulator, Overall UI/UX	Built the Telephony & Telecom Intelligence card in Cockpit displaying carrier, line type, risk score, and PhoneInfoga OSINT data.

Integration, Verification & Quality Assessment

Cross-Module Integration:	Tested phone number extraction from email footers and verified automatic carrier/telecom attribution in Cockpit.
Quality Assurance Status:	All code unit tests and interface contracts for Day 6 verified clean. Git commit pushed with zero blocking errors.
