

Day 7: Dynamic Risk Scoring Engine (Bayesian Synthesis) & Evidence Vault

Key Milestone: Multi-Vector Bayesian Scoring Synthesis

Sprint Focus: Execution of core deliverables for Day 7 across AI/NLP, Header Forensics, IOC Extraction, Graph Correlation, Case Management, and UI Integration.

Daily Deliverables: Composite Risk Scoring Engine v1.0, Evidence Locker UI, Similar Attacks Recommender.

Individual Team Member Task Breakdown & Contributions

Team Member & Lead Role	Domain & Ownership Area	Tasks Executed & Deliverables on Day 7
Muniswami.Y AI / NLP Lead	Explainable AI, Intent & Phishing Detection, Social Engineering signals	Tuned Bayesian weights for NLP indicators: penalty adjustments for spoofed executive display names and fake invoice keywords.
Jeevan reddy.G Header & Forensics Lead	Email header analysis, SPF/DKIM/DMARC, Mail path reconstruction, Timestamp analysis	Constructed the Raw Header Forensic Inspector view showing detailed hop-by-hop latency breakdowns and transport encryption (TLS 1.3).
Lahari.K IOC & Infrastructure Lead	URL, Domain, IP extraction, Geolocation, ASN/ISP mapping, Malicious indicator detection	Integrated threat reputation caching to reduce external API latency; implemented domain age and WHOIS registration verification.
Hemanth.P Graph & Campaign Intelligence Lead	Attack Relationship Graph, Similarity detection, Campaign grouping & correlation	Built Similar Attack Recommendation Engine: surfacing the top 3 historical cases matching the active incident's IOC graph topology.
Abbas.N Risk, Case & Response Lead	Dynamic Threat Score engine, Automatic Forensic Case creation, Recommended Response actions	Developed the Quarantine Vault data models and automated server-side mailbox relocation rule generator.
Moulaanbee.N Frontend + Assistant + Simulator Lead	Dashboard, Visualizations (Graph, Map, Timeline), AI Chatbot, Email Threat Simulator, Overall UI/UX	Created the Evidence Locker modal and interactive Timeline component tracking the lifecycle of forensic artifacts.

Integration, Verification & Quality Assessment

Cross-Module Integration:	Validated the 0-100 composite risk scoring engine across 150 benchmark test cases (clean, marketing, spear-phishing, BEC).
Quality Assurance Status:	All code unit tests and interface contracts for Day 7 verified clean. Git commit pushed with zero blocking errors.
